

Data Analyst - Sample Job Description

Location: Remote / Hybrid

Experience: 0-3 Years

About the Role

We are looking for a Data Analyst to collect, clean, analyze, and visualize data to support business decisions. The ideal candidate should be comfortable working with datasets, generating insights, and presenting findings to stakeholders.

Responsibilities

- Collect, clean, and validate data from multiple sources.
- Analyze datasets to identify trends, patterns, and opportunities.
- Create dashboards and reports for stakeholders.
- Write SQL queries to extract and manipulate data.
- Perform exploratory data analysis (EDA).
- Communicate insights through visualizations and presentations.
- Work with cross-functional teams to solve business problems.

Required Skills

- SQL (Joins, CTEs, Window Functions)
- Microsoft Excel / Google Sheets
- Python (Pandas, NumPy, Matplotlib)
- Data Cleaning and Data Visualization
- Statistics and Probability Fundamentals
- Dashboarding Tools (Power BI or Tableau)
- Analytical and Problem-Solving Skills

Preferred Skills

- A/B Testing and Experimentation
- Machine Learning Fundamentals
- Big Data Technologies (Spark, Hadoop)
- ETL Pipelines
- Business Intelligence Concepts

Education

Bachelor's degree in Computer Science, Statistics, Mathematics, Economics, Engineering, or a related field.
