

Full Stack Web Developer - Sample Job Description

Location: Remote / Hybrid

Experience: 0-3 Years

About the Role

We are seeking a Full Stack Web Developer to design, develop, test, and maintain scalable web applications. The ideal candidate should be comfortable working across both frontend and backend technologies.

Responsibilities

- Develop responsive user interfaces using modern frontend frameworks.
- Build and maintain backend APIs and services.
- Integrate databases and third-party services.
- Collaborate with designers, product managers, and engineers.
- Optimize applications for performance and scalability.
- Write clean, maintainable, and testable code.
- Participate in code reviews and debugging activities.

Required Skills

- HTML5, CSS3, JavaScript (ES6+)
- React.js / Next.js
- Node.js and Express.js
- REST APIs and JSON
- SQL or NoSQL databases (MySQL, PostgreSQL, MongoDB)
- Git and GitHub
- Data Structures and Algorithms

Preferred Skills

- TypeScript
- Docker and CI/CD pipelines
- Cloud platforms (AWS, Azure, GCP)
- Authentication and Authorization (JWT, OAuth)
- Testing frameworks

Education

Bachelor's degree in Computer Science, Information Technology, or a related field.
